GLOGAUAIR OPEN STUDIOS + COME UNDONE 18.03.2016 - 19.13.2016

Every three months, in March, June, September and December, GlogauAIR's resident artists open the doors of their studios to the public, showing them their on-going projects, making them closer to artistic processes and practices.

GlogauAIR Artist in Residence Program is situated in a 19th century building built by the famous architect Ludwig Hoffman. It was founded in 2006 by the Spanish artist Chema Alvaronzález as a multidisciplinary platform for artistic production, collaboration and exchange.

In GlogauAIR artists from all sort of artistic disciplines, from diverse social and geographical backgrounds find a place to develop their works in a dynamic environment of coexistence, exchange of ideas and internationalization, as well as create a dialogue with the city of Berlin, which has become a pioneer place for contemporary culture.
